

Dear FCC,

This is in regards to the Radio Amateur Foundation (RAF) petition RM-10868. I disagree with the Radio Amateur Foundations proposal. Technician Class licensees should not be given additional privileges when all they would have to do to get those additional privileges for either a General Class or Extra Class license is upgrade by taking the required exams. Novice class licensees and Advance class licensees should not be upgraded or grandfathered to the next class of Amateur Radio License class without them having to take a current upgrade examination. Furthermore, the existing Amateur Radio question pools should not be scrapped because it would take to long to implement new ones.

I say no to RM-10868

Sincerely,

Victor Magana, N1VM
